### **VIA WEB PORTAL**

Dear Jon

### **PLANNING APPLICATION NO: A/21/92540/CON**

Thank you for your consultation on the above application to discharge conditions attached to permission A/19/87817/FUL.

Condition 6 – Unfortunately no new information has been submitted in regard to this condition, the applicants have merely re-submitted the same ecological report that came with the original application. While this includes recommendations for biodiversity enhancement measures, they are just that recommendations. The condition requires the submission of full details of what is actually going to happen on site. I am therefore unable to recommend the condition be discharged at this time.

Yours sincerely

Suzanne Waymont MCIEEM  
Senior Ecologist
